TPD Updates Property Room Policy and Allocates \$10,000 for Additional Security

Toledo, OH (February 14, 2019): Toledo Police are allocating \$10,000 for additional security technology in the department's property room and updating policy & procedure following an internal breach. The policy and security updates come amongst an ongoing investigation into a retired officer who worked in the property room from January 2013 until January 2018.

The investigation, which was initiated in November 2018 and is ongoing, focuses on items that went missing during the retired officer's watch. The updates in policy and security will add additional layers of oversight to the property room.

Additional updates will be made when the investigation is complete.
